The Complete Edging Solution

Multi Veneer - MR

## Multi Veneer - MR

A multi-layered edging made in continuous rolls from natural and reconstituted timber veneers. **Multi Veneer** edging is suitable for all edging applications including doors, drawer fronts, cabinet ends, desk tops and bench tops.

Consolidated Veneers **Multi Veneer MR** (Moisture Resistant) 2mm timber edging is produced using Poly Urethane Reactive (PUR) adhesives to bond each layer together. Benefits of using 2mm **Multi Veneer** edging bonded with PUR are:

**Excellent Moisture Resistance (MR):**

No water penetration into the boundary layer

**Superior Bond Strength and Heat Resistance:**

Due to the chemical cross-linking reaction

**Excellent Resistance to various solvents:**

Due to the chemical cross-linking reaction

**Excellent water and steam resistance:**

Due to the chemical cross-linking reaction

### Advantages

**Continuous roll form** – optimizes edgebanding speed whilst minimizing offcuts and wastage as experienced with short veneer strips.

**Pre-primed** – ready for edgebanding, no more priming of those solid timber strips.

**Face Sanded** – ready for lacquering after edgebanding.

**Attractive appearance** – uniform colour with near invisible joints.

**Reduced waste** – no more offcuts or blemishes as with solid timber strips.

**Original natural veneers** – Consolidated Veneers' range of Australian species is produced using locally sourced face material, ensuring "True Australian Species" – no substitution.

**Comprehensive range** – 20 species in stock.

**Ease of application** – suitable for use on most edgebanders.

### Application

**Multi Veneer** can be applied using a wide selection of equipment including hotmelt edgebanders, hot air

edgebanders (for preglued stock), or by hand using contact adhesives.

Most edgebanders' trimming devices will cut **Multi Veneer** cleanly without difficulty.

**Multi Veneer** can also be trimmed easily using a router.

For best results when applying unglued **Multi Veneer**, we recommend **EDGEBOND** granulated and cartridge hotmelts, available ex-stock from Consolidated Veneers.

### Range

**Multi Veneer** edging is available ex-stock from Consolidated Veneers or from one of our distributors in a range of sizes listed below:

**Standard widths:** 22mm, 29mm, 38mm

**Roll sizes:** 100m & random length

**Standard thickness:** 2mm

**Range of species includes:**

American Cherry	New Guinea Walnut
American Oak	Pine
American Walnut	Rock Maple
Anegre	Sapele
Beech	Spotted Gum
Brushbox	Tasmanian Blackwood
